Nature and Extent of Confidentiality: There is a need for confidentiality with respect to all owners of Marine VHF radios with Digital Selective Calling (DSC) capability in this collection.

The licensee records will be publicly available and routinely used in accordance with subsection (b) of the Privacy Act of 1974. FRN numbers and material which is afforded confidential treatment pursuant to a request made under 47 CFR 0.459 of the Commission's rules will not be available for public inspection. Any personally identifiable information (PII) that individual applicants provide is covered by a system of records, FCC/WTB-1, "Wireless Services Licensing Records", and these and all other records may be disclosed pursuant to the Routine Uses as stated in the SORN.

Needs and Uses: The information collected is necessary to require owners of marine VHF radios with Digital Selective Calling (DSC) capability to register information such as the name, address, type of vessel with a private entity issuing marine mobile service identities (MMSI). The information would be used by search and rescue personnel to identify vessels in distress and to select the proper rescue units and search methods.

The requirement to collect this information is contained in international agreements with the U.S. Coast Guard and private sector entities that issue MMSI's.

The information is used by private entities to maintain a database used to provide information about the vessel owner in distress using marine VHF radios with DSC capability. If the data were not collected, the U.S. Coast Guard would not have access to this information which would increase the time and effort needed to complete a search and rescue operation.

Federal Communications Commission.
